with every ejection opening of the upper part being associated with an individual contact surface that is connected to a control/computing unit via an individual strip conductor...

with a common contact surface that is connectable via a common strip conductor to the control/computing unit, the common contact surface being associated with the guide slot...

at least one of the individual strip conductors or the common strip conductor being through-connected to the other side of the upper part and being connected to the control/computing unit,

the individual contact surfaces, the individual strip conductors, and individual contact points, connected to the individual strip conductors and the common contact point, connected to the common strip connector being disposed on a side of the upper part that is turned away from the bottom part,

the common contact surface and a first region of the common strip conductor being disposed on a side of the upper part that is turned towards the bottom part, and the first region of the common strip conductor being electrically connected via a through-connection of the upper part to a second region of the common strip conductor that extends on the side of the upper part that is turned away from the bottom part to the common contact point ... in combination with the rest of the claim language is not taught or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
